

A Test for IgG1-4 and C3d Sample Type: Bloodspot Name: CORKADEL, CAROLE Date Drawn: 06/22/2025 Date of Birth: 02/04/1974 Date Completed: 07/07/2025 Provider: Accession Number: 231505 Kevin Rutherford

List of Restricted Foods:	
4+ Reactions:	Egg Yolk Egg White Wheat, Gliadin
3+ Reactions:	Wheat, Gluten Garlic Snapper Shrimp
2+ Reactions:	Cow's Milk Whey Wheat, Whole Potato, Sweet Summer Squash Coffee

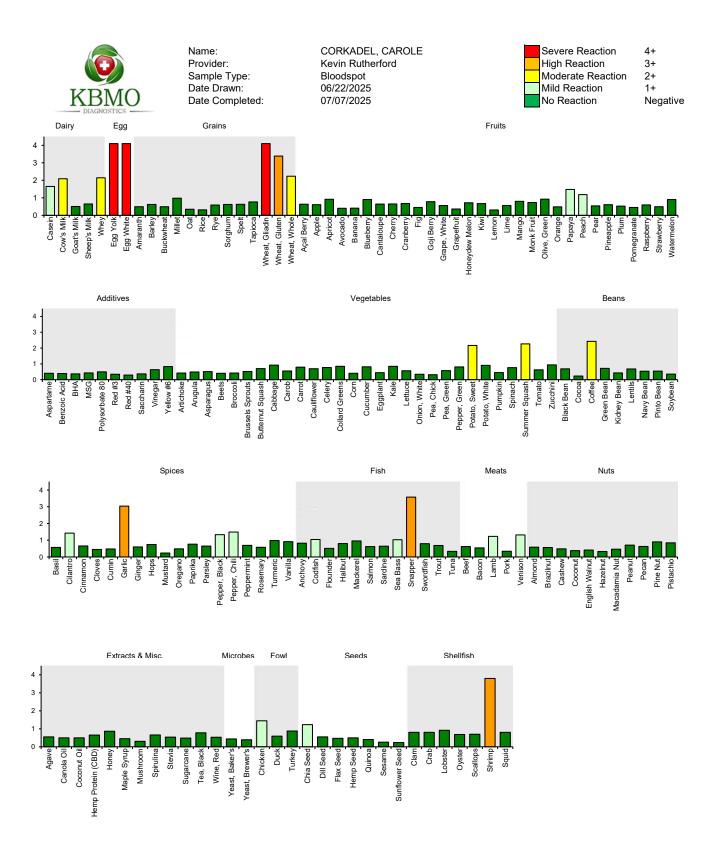

Laboratory Information: KBMO Diagnostics Phone: 617-933-8130 Fax: 617-933-7660 4 Business Way

Hopedale, MA 01747 E-mail: LabSupport@KBMODiagnostics.com Jia He, PhD, NRCC CLIA ID #: 22D2095272

Laboratory Medical Director Patent #: 8309318

This test was developed and its performance characteristics were determined by KBMO Diagnostics, LLC. It has not been cleared by the U.S. Food & Drug Administration (FDA).

Name: Provider: Sample Type: CORKADEL, CAROLE Kevin Rutherford Bloodspot

## **Gut Barrier Panel**

KBMO has created a unique Gut Barrier Panel which in recognition that leaky gut occurs across a spectrum we have included the following gatekeeper markers: Candida, Zonulin and Occludin and LPS. For each marker, we measure IgG 1-4 /C3d in addition to IgA 1 and 2.

#### Candida:

we measure and use any candida overgrowth in the stomach/dysbiosis as a precursor to leaky gut occurrence

#### Zonulin:

Is a marker of intestinal permeability, otherwise known as leaky gut. If a patient has elevated Zonulin levels, the normal regulation of the tight junctions is compromised. This Zonulin marker is unique to KBMO please follow the link for more information:

http://kbmodiagnostics.com/zonulin-test/

### Occludin:

is a marker of tight junction stabilization and optimal barrier function. Elevated occludin indicates that the tight junctions are breaking down.

## LPS:

Lipopolysaccharides (LPS) are a major structural component of the outer membrane of gram-negative bacteria. Elevated levels of antibody against LPS may be indicative of Leaky Gut Syndrome and other gastrointestinal inflammatory diseases. For more information on LPS, please visit the following link:

https://kbmodiagnostics.com/gut-barrier-panel/

# GB Panel Interpretation:

If any of the 8 markers are positive, we recommend to consult your provider with regards to a gut healing protocol.
